

Aquam Hydrant Finder App - Installation & Registration

The Aquam Hydrant Finder application is available on two distinct platforms:

- Mobile devices (Phones & Tablets) based on Android or Apple operating systems.
- Desktop web browsers, such as Google Chrome, Microsoft Edge, Firefox & Apple Safari.

An email (username) and password sign-in is required.

Note: The same sign-in can be used on both mobile and desktop versions.

(You only need to register your sign-in details once).

To install the mobile app,

- Open the app store on your mobile device
Google Play or the Apple App Store.
- Search for “Aquam hydrant Finder” and install the app.

To access the desktop/browser app:

- In your browser navigate to: <https://hydrantfinder.aquamcorp.co.uk>

On either platform, to register your details:

- Click/Tap the “Sign in” button.
- Click on the “Sign up now” link and enter your email.
- Click “Send verification code”.
- Check your email system for the code, then enter the “verification code” on the app.
- Once the code is verified, you can enter your preferred password.
Passwords are a minimum 8 characters and at least 3 of 4 character classes - uppercase, lowercase, number, symbol.
- Enter your preferred “Display Name”.
- A valid Calm Network Certificate is also required to view hydrant locations.
Fill the two boxes for Calm Network Certificate (number) and Calm Certificate Surname.
- Finally, click the Create button and you will be returned to the app main page.

Once registered, you may now use your GPS location (mobile devices only) or enter a postcode.

After clicking on Refresh, the nearest 10 hydrants will be displayed.

Note: Clicking refresh also validates the Calm Network Certificate.

If certificate validation fails, you can click on “Edit Profile” to correct the details.
